EDUCATION

Atharva College of Engineering

Btech in Electronics and Telecommunication - **8.82**

Mumbai, Maharashtra

June 2019 - Aug 2022

TECHNICAL SKILLS

Languages: C++ , Javascript, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Bootstrap, ShadCN, Tailwind CSS

Databases: MongoDB, MySql

Technologies and Tools: RESTful APIs, Socket.io, Zod, Auth.js, Zustand, Clerk, Cloudinary, Github, Postman, Linux

Software Engineering Principles: Data Structures and Algorithms, Low Level Design(LLD), Object Oriented Programming(OOPS), Object Oriented Analysis and Design, SOLID Principles

WORK EXPERIENCE

Full Stack Development Intern

Edureka, Bengaluru, India

Aug 2022 - Apr 2023

- **Awarded the Super Intern** Certificate for outstanding performance and contribution.
- **Resolved** 10+ high-priority bugs and code issues across the backend, enhancing platform reliability and overall user experience.
- Assisted in refining frontend interfaces with **Tailwind** and **React**, contributing to cleaner and more adaptive UI.
- **Designed and developed** full-fledged applications from scratch, covering frontend UI, backend logic, API integration, and deployment.

PROJECTS

- **AI-Chat-App**, Built a real-time AI-powered chat application enabling users to interact with an **AI assistant** similar to ChatGPT.
 - Delivered an end-to-end solution using **React.js**, JavaScript, Node.js, and Express.js, integrating the **Ollama Gemma model** for intelligent and context-aware AI responses.
 - Engineered **real-time message** streaming with **Socket.io**, reducing AI response latency and improving user experience.
 - Implemented **React-Redux** for predictable state management, ensuring smooth UI performance even during high message throughput.
 - **Enhanced AI calls** so that after each message from the user, the AI generated replies considering the entire conversation history for more **coherent and context-aware responses**.
- **Anonymous Message**, Built a secure, **AI-powered messaging** platform using Next.js, TypeScript, and Auth.js with a responsive UI and **intelligent message suggestions**.
 - Engineered the platform using **Next.js** and **TypeScript**, focusing on performance, scalability, and seamless user experience.
 - Implemented **Auth.js** for secure user authentication and route protection.
 - Built a modern, **responsive UI** using Tailwind CSS and **ShadCN** components, ensuring a clean and accessible design.
 - Leveraged **Google Generative AI** to offer intelligent, creative message suggestions, enriching user engagement and reducing writer's block.

This project highlights my ability to **integrate AI tools** into modern full-stack applications and deliver intuitive, secure, and feature-rich user experiences. [Try it!](#)

CODING PROFILES

- **Leetcode + Geeksforgeeks:** 500+ problems Solved

CERTIFICATIONS

- **Awarded Super Intern - FullStack Development**
- **Low Level Design by CodeHelp**

EXTRACURRICULAR ACTIVITIES

- **Team Managment** in Atharva Educational Trusts College of Engineering
